**Target Organs:**      None.

**Inhalation:**      No hazard for product as sold. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating. Repeated and prolonged inhalation of dust may lead to chronic respiratory irritation. See Section 8. Asthmatic conditions may be aggravated by uncontrolled airborne dust exposures.

**Skin Contact:**      Solid sheet may be abrasive to, or cut skin. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating.

**Eye Contact:**      Dust generated from fabrication operations may cause mechanical irritation of the eyes.

**Ingestion:**      Not an expected route of entry with normal use of product.

**HMIS (United States):**

REACTIVITY	0
PPE	B

**NFPA (United States):**

**WHMIS (Canada): Not classified as hazardous.**

## 4 FIRST AID MEASURES

- Inhalation:** No hazard for product as sold. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating or harmful if inhaled. If irritation persists, seek medical attention.
- Skin Contact:** Solid sheet may be abrasive to, or cut skin. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating.  
Wash with soap and water. If irritation persists, seek medical attention.
- Eye Contact:** No hazard for product as sold. Fabrication operations such as milling, cutting, grinding, etc., may produce dust or chips that may be irritating. Rinse eyes with water for 15 minutes. If irritation persists, seek medical attention.
- Ingestion:** Not an expected route of entry with normal use of product.

## 5 FIRE FIGHTING MEASURES

- Flash Point:** Not Applicable.  
**Flash Point Method:** Not Applicable.  
**Autoignition Temperature:** Not Applicable.

Wear extinguishing media appropriate for surrounding fire. Use fire protection equipment (i.e. self contained breathing apparatus) appropriate for the surrounding fire. Hazardous decomposition products include carbon oxides (CO and CO<sub>2</sub>).

### UNUSUAL FIRE & EXPLOSION HAZARDS

Product as sold does not present an explosion hazard. Finely divided dust generated by fabrication operations such as milling, cutting, grinding, etc., can create an explosion hazard if the airborne dust concentration exceeds 900 grams per cubic meter and it contacts an ignitions source greater than 8 joules (A person standing in a uniformly dispersed dust cloud of 50 grams per cubic meter will not be able to see his/her outstretched hand).

## 6 ACCIDENTAL RELEASE MEASURES

**Small spill or leak - Not applicable.**

**Large spill or leak - Not applicable.**

## 7 HANDLING AND STORAGE

- Handling Precautions:** No specific usage precautions required. Follow normal good hygiene practices. Protect exposed areas from cuts and abrasions.
- Storage Requirements:** Store in a dry, well ventilated area. Trace amounts of formaldehyde may be released when laminate is shipped or stored.

## 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

- Engineering Controls:** No special ventilation requirements for product as sold. Provide adequate ventilation to meet exposure guideline if fabrication operations generate dust or chips.
- Protective Equipment:** When ventilation is not adequate, wear an approved/certified respirator with an appropriate particulate dust filter.  
Gloves suitable for protection against cuts and abrasions from sharp edges are recommended.  
Wear safety goggles during fabrication operations that produce materials, i.e. chips, that may be ejected and impact the eyes.

Exposure Guidelines/Other:	Product Name	Exposure Limits
